Notice of Export Price Revision

Dear Valued Partners,

We sincerely appreciate your continued support and trust in our products.

We would like to inform our partners in Vietnam that, effective from shipments on January 1, 2027, we will revise the export prices of all our roof tiles, including Flat Tiles, J-Type Tiles, Asukano Tiles, Honbuki Tiles, and accessory tiles.

This revision is driven particularly by rising international shipping and export-related costs. Ocean freight, fuel surcharges, container transportation, port handling, export packaging, and other logistics expenses have placed increasing pressure on our export pricing.

Manufacturing costs have also continued to rise, including raw materials, energy, labor, and equipment maintenance. Despite our efforts to control expenses and improve efficiency, these combined increases have made it difficult to maintain our existing export prices.

We have therefore carefully reviewed our export pricing to reflect the costs of production and international delivery, while maintaining the quality of our products and a reliable supply. Revised prices will be provided in our updated export price lists or individual quotations.

We value our long-term partnership and sincerely appreciate your understanding and continued cooperation.

Sincerely yours,

Kentaro Sumiya
Section Chief, International Department
EISHIRO KAWARA CO., LTD.
