

Dynasphere Air Terminal, MKIV – D/SMKIVSS

The economic and safety implications of lightning can be devastating. In general, the highest point of a facility is the most vulnerable to a direct lightning strike. Lightning rods or air terminals are needed to capture the strike to a preferred point and to safely conduct the energy to ground to minimize the risk. The nVent ERICO Dynasphere air terminal provides a preferred point for lightning discharges which would otherwise strike and damage an unprotected structure and/or its contents. The primary function of an air terminal, or air termination system, is to capture the lightning strike to a preferred point, so that the discharge current can be directed via the downconductor(s) to the grounding system.

- Dynamic response to the approach of a lightning downleader
- Non-radioactive technology
- No external power required
- Three replaceable terminals for specific elevation requirements

Part Number	D/SMKIVSS
Material	Stainless Steel 316 (EN 1.4401)
Temperature	-40 to 212 °F
Effective Projected Area	42 in ²
Diameter (Ø)	10.098"
Height (H)	8.661"
Thread Size (TS)	1/2 BSPP
Unit Weight	5.735 lb
Certifications	UL
Standard Packaging Quantity	1 pc
UPC	78285664528
EAN-13	8711893024753

UL, UR, cUL, cUR, cULus and cURus are registered certification marks of UL LLC.

WARNING

nVent products shall be installed and used only as indicated in nVent's product instruction sheets and training materials. Instruction sheets are available at www.erico.com and from your nVent customer service representative. Improper installation, misuse, misapplication or other failure to completely follow nVent's instructions and warnings may cause product malfunction, property damage, serious bodily injury and death and/or void your warranty.
