DESERT

A man and a woman are posing against a plain grey background. The man, on the left, is wearing a dark blue t-shirt and dark blue jeans, looking back over his shoulder. The woman, on the right, is wearing a dark blue sleeveless top and dark blue jeans, also looking back. They are both holding a large, tan-colored bag with multiple straps and buckles. The bag is positioned between them, with the man holding one side and the woman holding the other. The bag has a complex design with various compartments and a sturdy webbing structure.

The Anti-Gravity backpack with elastic shoulder straps to lighten the weight

The anti-gravity system is inspired by the ancient Chinese “Bian Dan”, a way of carrying two containers of similar weight on a pole made of bamboo, a flexible material able to reduce the sensation of heaviness. With the elastic movement of the shoulder straps, our AGS System reduces the stiffness of the back and neck muscles, buffering the pressure of the backpack’s load through an even distribution of the weight between your hips and shoulder
