

HR2000

For Heat Resistance

High temperature resistant silicone sealant

● Application

- Sealing industrial ovens, boilers, and fixed heaters
- Bag filters on smoke stacks
- Sealing & encapsulating heated elements in appliances
- Windows in oven doors

● Characteristics

- Heat-resistance to continuous exposure at 50 °C to 260 °C
- Heat-resistance to intermittent exposure up to 300 °C

Tack Free	Less than 15 min
-----------	------------------

Specific Gravity	1.04 ± 0.02
------------------	-------------

Tensile Strength	10 ~ 15kgf/cm ²
------------------	----------------------------

Movement Allowance	± 50%
--------------------	-------

Color: Gray, Red
