# KEYENCE

Self-contained Photoelectric Sensor

## PZ-G Series

## Instruction Manual

Read this manual thoroughly before using the product. Keep this manual readily available for future reference

CE

96M11227

#### Safety precautions

- Avoid running the PZ-G cable along with power and high voltage lines, as this may cause interference and/or permanent damage.
- When using a commercially available switching regulator, ground its chassis grounding and earth grounding terminals
- Do not use in locations where direct ambient light or external light directly shines on the light receiving surface.
- With retro-reflective type sensors, when detecting highly reflective materials (such as mirrored surfaces), stabilization may be difficult. To correct this, change the angle of the sensor head, or adjust the sensitivity.
- Avoid using power which exceeds the specifications for ripple (10% max)
- Avoid using excess force when rotating the operation mode selector switch (Light-on, Dark-on) and the sensitivity adjustment trimmer
- This product is just intended to detect the object(s). Do not use this product for the purpose to protect a human body or a part of human body.
- This product is not intended for use as explosion-proof product. Do not use this product in a hazardous location and/or potentially explosive atmosphere

## **Precautions on Regulations and Standards**

#### **■** UL Certificate

This product is an UL/C-UL Listed product

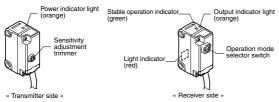

- UL File No. E301717
- Category NRKH,NRKH7
- Enclosure Type 1 (Based on UL50)

Be sure to consider the following specifications when using this product as an UL/C-UL Listed

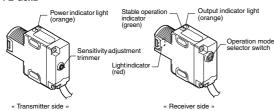

- Use the power supply with Class 2 output defined in NFPA70 (NEC: National Electrical Code).
- Power supply/ Control input/ Control output circuits shall be connected to a single Class 2
- Use with the over current protection device which is rated 30V or more and not more than 1A

#### **Part Names**

#### PZ-G5xN/G5xP

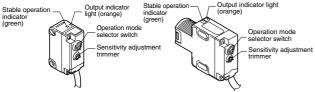

#### PZ-G5xB

#### PZ-G4xN/G4xP/G10xN/ G10xP/G6xN/G6xF

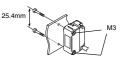

#### PZ-G4xB/G10xB/G6xB

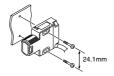

The model name with "C" (PZ-GxxCx) is the connector type, and the model name with "E" (PZ-GxxEx) is the pigtail quick disconnect type

### **Mounting Method**

### ■ Side Mounting (Prepare M3 screws)

Tightening torque: 0.5 N·m or less

### ■ Mounting with the M18 nut (includes nut type)

The M18 nut is also available separately as OP-84225 (2 pcs. supplied). Tightening torque:1.0 N·m or les

- Mount the M18 nut (supplied) straight in. If mounted at an angle it cannot be tightened properly.
- When tightening the M18 nut (supplied), firmly hold the main body down. The case of the main body may be damaged if held in place with a tool such as pliers. When tightening the M18 nut (supplied), if excess force is applied to the nut with a tool such as pliers, it may bend it out of shape. Therefore, do not apply excess force.

## Sensitivity Adjustment Method

Caution ⚠

Avoid using excess force when rotating the sensitivity adjustment trimmer and operation mode selector switch as it may cause damage

#### Operation mode selector switch

with the operation mode selector switch, you can select either the LIGHT-ON mode (L) or the DARK-ON (D) mode.

#### ■ Reflective type (PZ-G41/G42/G101/G102/G10R/G10G/G10B Series)

The following assumes LIGHT-ON (L) is set.

Sequence	Adjustment method	Sensitivity adjustment trimmer		
1	Position target in place. Slowly rotate the sensitivity trimmer from the MIN position towards the MAX position until the (orange) output indicator turns on (Position "A"). If the output indicator does not turn off, even at MIN, then MIN is considered Position "A".	A		
2	Remove the target. Adjust the sensitivity trimmer from MIN towards MAX until the (orange) output indicator turns on (Position "B"). If the output indicator does not light up, the MAX position is considered Position "B".	MIN MAX		
3	Adjust the sensitivity trimmer to the midpoint between "A" and "B". Verify that the (green) stable operation light turns on with and without a target in place.	AB		

Reference To use the sensor in DARK-ON mode, adjust the mode selector switch to "D".

#### ■ Thrubeam type (PZ-G51/G52 Series) / Retro-reflective type (PZ-G61/G62 Series)

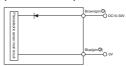

The following assumes DARK-ON (D) is set

Sequence	Adjustment method	trimmer			
1	Remove the target. Adjust the sensitivity trimmer to MAX. Mount the sensor heads in place so the (orange) output indicator turns off (on thrubeam models, the red light on the receiver face will turn on)	MIN MAX			
0	Position target in place. Verify that the orange output indicator turns on (on thrubeam models, the red light on the receiver face will turn off). Adjust sensitivity lower if the output indicator does not turn on (or if the red light on the receiver face does not turn off on thrubeam models)				

Reference To use the sensor in LIGHT-ON mode, adjust the mode selector switch to "L".

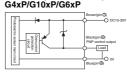

## I/O Circuit Diagram

## PZ-G5xN/G5xP/G5xB (Transmitter side)

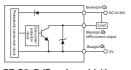

PZ-G5xP (Receiver side)/ G4xP/G10xP/G6xP

	M12 connector	

PZ-G-IM-E

#### ■ Indicators

The following describes each ON/OFF condition of indicator when LIGHT-ON (L) is set

Reference When the DARK-ON (D) is set, the output indicator ON/OFF will reverse.

\* For PZ-G62, the upper limit is 107% and the lower limit is 93%

If the stable operation indicator turns off during operation, readjust or fine-adjust the sensitivity

#### ■ Mutual interference

- For reflective type / retro-reflective type sensors, mutual interference protection can be set for up to 2 units. However, when the sensors are mounted facing each other, change the angle of the sensor head to prevent light being emitted into each unit. (The mark detection type does not include the mutual interference function.)
- Mutual interference prevention can be set when mounting a polarizing filter attachment (optional with thrubeam type sensors) (If operation is unstable even after mounting the polarizing filter, slightly lower the sensitivity.)
- For more detailed information about mutual interference or attachment, see the PZ-G Series catalog or contact your nearest KEYENCE office.

## **Specifications**

Туре		Thrub	peam	Reflective				Retro-reflective		Mark detection			
Configuration	Cable shape	Output mode	Normal	High-power	Long-detecting distance	Diffuse-reflective Short-detecting distance	Narrow-view reflective	Definite reflective	distance (with P.R.O. function)	Transparent target detection (without P.R.O. function)	Red	Green	Blue

### **WARRANTY**

KEYENCE products are strictly factory-inspected. However, in the event of a failure, contact your rest KEYENCE office with details of the failure

## 1. WARRANTY PERIOD

The warranty period shall be for one year from the date that the product has been delivered to the location specified by the purchaser.

### 2. WARRANTY SCOPE

- (1) If a failure attributable to KEYENCE occurs within the abovementioned warranty period, we will repair the product, free of charge. However, the following cases shall be excluded from the warranty scope.
  - Any failure resulting from improper conditions, improper environments, improper handling, or improper usage other than described in the instruction manual, the user's manual, or the specifications specifically arranged between the purchaser and KEYENCE.
  - Any failure resulting from factors other than a defect of our product, such as the purchaser's equipment or the design of the purchaser's software.

    Any failure resulting from modifications or repairs carried out by any person other than
  - KEYENCE staff.
  - Any failure that can certainly be prevented when the expendable part(s) is maintained or replaced correctly as described in the instruction manual, the user's manual, etc.
  - Any failure caused by a factor that cannot be foreseen at a scientific/technical level at the time when the product has been shipped from KEYENCE.

    Any disaster such as fire, earthquake, and flood, or any other external factor, such as
- abnormal voltage, for which we are not liable.

  The warranty scope is limited to the extent set forth in item (1), and KEYENCE assumes no
- liability for any purchaser's secondary damage (damage of equipment, loss of opportunities, loss of profits, etc.) or any other damage resulting from a failure of our product.

## 3. PRODUCT APPLICABILITY

KEYENCE products are designed and manufactured as general-purpose products for general

Therefore, our products are not intended for the applications below and are not applicable to them. If, however, the purchaser consults with us in advance regarding the employment of our product, understands the specifications, ratings, and performance of the product on their own responsibility, and takes necessary safety measures, the product may be applied. In this case, the warranty scope shall be the same as above.

- Facilities where the product may greatly affect human life or property, such as nuclear power plants, aviation, railroads, ships, motor vehicles, or medical equipment
- Public utilities such as electricity, gas, or water services
- Usage outdoors, under similar conditions or in similar environments

E 1040-1
