Cutter (optional)

Cometech provides a range of cutter types, with sizes customizable to meet specific customer requirements.

A. Thick Cutter

Constructed with folded sheet metal, this blade features reinforced walls, offering enhanced durability and strength. Ideal for tough, resilient materials that are challenging to cut, such as fabric and leather.

B. Thin Cutter

Manufactured with laser cutting for enhanced dimensional accuracy, this blade's thin walls make it suitable for slicing softer materials.

M0801-1032 ISO 37 TYPE1

M0801-1034 ISO 37 TYPE3

C. Precision Cutter

Crafted through heat treatment, grinding, and wire cutting processes, this cutter delivers superior strength and exceptional accuracy for precise cutting.
