

BACnet/IP & MS/TP Client to Modbus TCP & RTU Server Application

Item number: IN7004851K20000

Integrate any BACnet MS/TP or BACnet/IP server device with a Modbus BMS or any Modbus TCP or RTU controller. This integration aims to make BACnet objects, data, and resources accessible from a Modbus-based control system or device as if they were a part of the Modbus system and vice versa.
