Ixxat stub antenna

Antenna for Ixxat CANblue II

Item number: 1.04.0085.00001

The Ixxat Stub Antenna with a RP-SMA plug is an essential accessory for usage with Ixxat CANblue II devices. Its 1/2-wave coaxial dipole ensures stable wireless data transmission, while the 90° swivel toggle allows for ideal positioning and optimized signal coverage.

Features and benefits

Enhanced wireless range

Ensures reliable and efficient system operations of the Ixxat CANblue II by stabilizing wireless connections.

Efficient design

Featuring a RP-SMA female connector, a knee lever that swivels to 90 degress and a 360° rotatable coupling, the antenna enables optimal compatibility and positioning.

Optimal compatibility

Specifically designed for compatibility with Ixxat CANblue II in combination with the Ixxat Screwable Antenna Foot or the Magnetic Foot Antenna.

Technical data overview

Length: 10 cm / gain: 1 dBi / frequency: 2.4 Ghz / impendance: 50 Ohm / current rating: 50 watts / temperature range: -40 °C to 80 °C / half wave dipole / linear polarization

Ixxat stub antenna

General

Net Weight (g)	10
Packed Weight (g)	10

Identification and Status

Product ID	1.04.0085.00001
Country of Origin	Malaysia
HS Code	8517710000
Dual Usage	No

Physical Features

Contains Battery	No

Certifications and Standards

WEEE Category	IT and telecommunications equipment
