

COMPRESSION TOOL

All In One

PCT-AIO-CT

Innovation for the Last Mile®

INNOVATIVE SOLUTION

The PCT-AIO-CT compression tool is designed with the installers' needs in mind. The simple fact is that nobody wants to carry multiple tools, and with the AIO on the market, they no longer have to.

The PCT-AIO-CT All-In-One compression tool is PCT's solution to the problem of multiple tools in the field. The AIO is a uniquely designed compression tool that eliminates the need for installers to carry more than one tool. This tool is truly universal, and works with almost every connector on the market today. Different compression lengths can be selected with the simple push of a button, and a pop out mandrel allows for quick connector style selections. The pop out mandrel requires no calibration and is permanently affixed to tool body to prevent misplacement.

The AIO's rugged design stands up to even the most abusive environments. The PCT-AIO-CT All-In-One tool is truly the one of the most useful evolutions in compression tool technology.

Advanced Features

- Full 360° compression surface
- Flip latch secures connector assembly providing perfect alignment
- Use with multiple types of cable types - Series 6, 7, 11, 59 & 320QR
